

August 2009 Newsletter

COMING SOON!

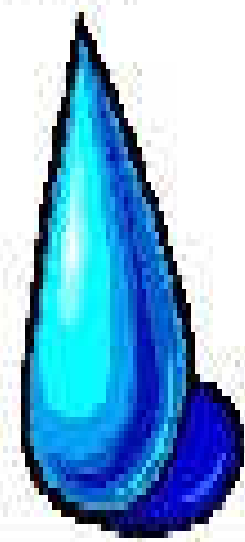

Root Diggin' Nation will be partnering with a Water Treatment Company in the area to help provide you with education and products to help purify and condition your water. Water is an essential part of life, so make sure yours is as pure as nature intended.

Water treatment equipment can help to remove toxins, particles, minerals and other additives that were never intended to pollute our water system.

As shown in July in Washington, MO with the Boil Order, our water system may not be as stable and pure as we assume it is.

Watch in the September Newsletter for a FREE

Informational class on water quality and treatment.

The independent advertisements in this newsletter are not endorsed or affiliated with Root Diggin' Nation Herb Co.

Scrapbooking Supplies

Special memories of family and family events are usually captured in pictures.

A scrapbook is a great way to display and preserve those memories.

We are now offering a limited supply of scrapbooking materials at our St. Clair location.

Crop dates at the store will be coming in the fall and winter.

Check the newsletter for details.

Classroom for Rent

Our classroom area at our St. Clair location is available for rent for your meeting or event.

Call 636-629-7776 for details.

ION FOOT CLEANSE

How does it work?

The array goes into the water with the hands, feet, or other body parts, and the control unit delivers a small direct current into the array, which causes the metals within the array, in combination with the water and salt, to generate positively and negatively charged ions. These ions neutralize charged particles in the body. The neutralized particles are pulled out of the body through the skin via osmosis and diffusion. Osmosis and diffusion involve the movement of particles through a membrane, from a lower concentration to a higher concentration. In this case, the higher concentration is the ion field set up by the array in the water.

Ionization has been used for many decades.

However, the concept of using ionization in a foot bath, such as the IonCleanse®, is a relatively new idea. Similar phenomena occur while walking along a beach or near a waterfall. Ions are generated by the movement of the water molecules. We are creating the same reactions with the IonCleanse®, only magnified many times over.

Disclaimer: The IonCleanse® is part of a comprehensive health and wellness system and the information provided by A Major Difference is solely for use as part of a self-improvement program. None of the information provided on is intended to act as a substitute for medical counseling. The IonCleanse® is not intended to treat, prevent, cure, or diagnose any disease or ailment.
