Reduce Body Odors, Where They Originate.

Finally, a Clinically Proven Natural Supplement for Reducing Offensive Body Odors

Did you know that:

• 25% of your customers suffer from chronic bad breath?
• The average person passes gas 10 times a day?
• Both men and women rank body odor as the biggest date turnoff?

Unfortunately, there hasn’t been a research-backed supplement for eliminating offensive body odors until now.

Introducing Deodorex™ with Champex®

Quality of Life Labs is pleased to introduce DEODOREX®, the clinically proven natural way to reduce body odor, bad breath, and flatulence where they originate.

What Causes Offensive Body Odors?
Body odor, bad breath, and flatulence are caused when a portion of the food we eat is decomposed by intestinal bacteria and converted into toxic chemicals — such as ammonia, amines, hydrogen sulfide, mercaptans, indole, and skatole. Not only do these toxic byproducts create offensive smells, they can also negatively affect the kidneys, blood pressure, and health of the cells.

A patented, proprietary extract from the edible champignon mushroom, Deodorex effectively reduces body odors where they originate, by decreasing levels of toxic chemicals in the intestines and blood.*

Deodorex Benefits to Consumers:
• Reduces body odors by up to 60%*
• Inhibits the chemical that causes bad breath*
• Purifies the blood of ammonia*
• Decreases levels of uric acid*
• Supports the health of the kidneys*

Deodorex Plus Benefits to Retailers:
• Addresses a pressing need: A large segment of the population suffers from offensive body odors, but the natural products market has not yet effectively addressed the need.
• Clinically proven: Unlike chlorophyll, the primary supplement used for odor control, Deodorex has been the subject of in vitro, in vivo and human clinical research showing it is effective.
• Wide appeal: Deodorex’s primary audience is people who suffer from body odor, bad breath, and flatulence. However, Deodorex will also appeal to consumers who want to purify the blood, decrease levels of uric acid in the body, and support the health of the kidneys.

“The repressive effects of Bio-M [the active ingredient in Deodorex] administration on the generation of…odor components and ammonia in the blood are extremely remarkable.”

* Dr. Jiro Abe, Dr. Kiyoshi Kanaya, & Dr. Toshimitsu Toyoshima, in a report presented to the 36th Congress of Tohoku Clinical & Hygienic Examination Society
