Liquid Herbal Extracts *Immune Attack*

IMMUNATTACK by Herb Pharm is a herbal liquid extract used to boost the immune system and attack free radicals that cause colds and flues. With a blend of echinacea, spilanthes, wild indigo root and myrrh extract—IMMUNATTACK boosts the immune system in a number of ways.

Echinacea is a potent preventer of colds and flues, and fights infections by increasing the speed at which immune cells make their way to the infected site.

Spilanthes is traditionally vital to treat stomach aches, and acts as a great antifungal, antiviral immune system stimulating herb.

Wild Indigo Root is an antimicrobial herb that contains polysaccharides that stimulate the immune system to prevent the flu and common colds.

Lastly, Myrrh Extract is used to relieve pain, fight inflammation and assist healing and is medically used to relive chest problems such as bronchitis.

If you are looking to boost your immune system to prepare for the cold and flu season, or if you need assistance in fighting off infections or viruses, get your IMMUNATTACK by Herb Pharm today!
