An Ancient Remedy That Works

The Greek physician, Pedanius Dioscorides (40-90 AD) first documented the health benefits of a pinecone extract in De Materia Medica, one of the most influential herbal books in history. Dioscorides describes using extracts of pinecones to treat a variety of ailments and to apply to the skin to treat topical disorders.

For much of the last century the Japanese inhabitants of the island of Kyushu have also known about the medicinal properties of a pinecone extract. They used an aqueous extract (tea) prepared from pinecones to keep healthy. More recently, pinecone extracts have been demonstrated to have immuno-modulatory effects in animals, and epidemiological evidence also suggests health benefits in humans [2-7].

Proligna® pinecone extract has been awarded 11 patents internationally and is described in over 30 peer reviewed scientific studies.

In a time when optimum immune function and balance is increasingly important, Proligna® pinecone extract could not be more perfect. A healthy immune system is the body’s best defense.

A Solution Backed By Science

In over 20 years of laboratory studies, scientists have shown several key and unique ways that Proligna® pinecone extract supports immune function. First, Proligna® promotes dendritic cell development 9x in 9 days in human blood samples. As the key ‘identifier’ cells, dendritic cells control immune response by first recognizing pathogens and then educating the immune system accordingly; without dendritic cells, the immune system is 'flying blind'.

Immune Extra® increases immune cell development 9 fold in 9 days. [2]

Scientists recently demonstrated that Proligna® pinecone extract:
1. Enhances the protective Th1 response.
2. Decreases the "proinflammatory Th2 response" in animals fed Proligna in their drinking water. [3]

Taken together, these data suggest that Immune Extra® works by rebalancing the immune response so that it can be more effective.

How to Strengthen Your Immune System

Stress, poor diet, lack of sleep, even some medications can reduce your immune system’s ability to work at its peak. Unlike any other immune support product, Immune Extra® contains Proligna® pinecone extract, a safe, multi-patented, natural water extract from Scotch pinecones. Taken daily, Immune Extra has a unique ability to strengthen, balance, and optimize immune function. Immune Extra: Like a vitamin for your immune system.

East meets West

“In Japan, there is an understanding that traditional remedies are important. For example, pinecones are traditionally boiled in water in a big kettle; in my family, we would drink this extract like a tea.

It’s a primitive method, but effective for boosting the immune system.

In Japan, the practice of using herbs has continued for many, many years, for centuries even. Why? Because it works!”

—Dr. Akiko Tanaka
President, Tampa Bay Research Institute
Developer of pinecone extract

Immune Extra® is the only product containing all natural Proligna® pinecone extract — the same extract used in Japan — in a convenient vegetarian capsule.

THE IMMUNE EXTRA® GUARANTEE
ImmunExtra® is backed by an unconditional 60 day money back guarantee. If you are not 100% satisfied with your purchase for any reason, just return the bottles you ordered (even the open or empty one) for a full product cost refund. We do not refund or credit shipping and handling charges.
