Chronic and Acute Pain (Curamin)

I have been in the health food industry for almost 40 years and have personally designed and developed over 300 formulations.

I’m not trying to impress you with my accomplishments. The point I’m trying to make is that I have a tremendous amount of experience and knowledge in developing and discovering natural formulations. Now I have discovered a pain relieving formulation that is almost unbelievable even for me.

This formulation is stronger and more effective than aspirin or any other kind of medication in relieving pain and inflammation. This formula will work like a miracle for anyone who uses it. I know the word miracle is a bit much in the scientific world but trust me and read on.

If you don’t believe it’s a miracle I’d be totally surprised. Here are the natural ingredients in the formulation that will relieve any kind of pain: Curcumin, curcuminoids, dl phenylalanine, Boswellia and Nattokinase. This formulation has a powerful impact on improving the health of anyone dealing with pain or inflammation. It is now clear that many health concerns are related by the presence of inflammation. When you relieve inflammation you relieve pain. From research we know that one of the most important preventative medications for heart attack and stroke is aspirin, one of the most simple and oldest anti-inflammatories. Other anti-inflammatories such as ibuprofen may protect against Alzheimer’s disease. But in the case of anti-inflammatory drugs, more is not clearly better. These drugs also have significant side effects such as causing irritation and sometimes damage to the stomach, intestinal tract, kidneys and liver. Remember that inflammation causes pain—both acute and chronic. Researchers have discovered an all natural combination of ingredients that will relieve pain without any side effects.

Common herbs — Turmeric and Boswellia have been known for years to relieve pain and inflammation. Curcumin, the active ingredient in Turmeric is a better antiinflammatory than cortisone, one of the most powerful of the steroids. Researchers have isolated a factor known as a curcuminoid in curcumin which is approximately 100 times as potent as regular Curcumin in reducing inflammation, when combined with DLPA (dl Phenylalanine) and Boswellia.

Curbumin for a very powerful natural anti-inflammatory effect. Boswellia is also a well known herb which has very powerful anti-inflammatory properties. DLPA is a common amino acid which has the ability to increase serotonin levels in the brain. When you use this formulation, all the natural ingredients work together synergistically to perform as the most powerful pain reliever that I have ever experienced and now you can experience it too.

Read what others have experienced:

I just wanted you to know how happy I am with this new formula. When I met you the day before the marathon, I told my husband I was going to try and run the marathon but my knees were hurting so bad that I never thought it would be possible. When you said this for-
Formula of herbs would make all the difference whether or not I would finish the marathon, I was very skeptical. Since my husband has known you for years, I did as you suggested and took 3 capsules 45 minutes before the marathon. I ran the entire marathon without any pain and did not have any pain the following day. After I told my husband of the results, he stopped at your store and bought three bottles, one for me, one for himself and one for his golfing friend. His friend has not felt good in 20 years having two fused discs with constant back pain. Since the two were going to be golfing together the following day, my husband suggested to his friend that he take 3 capsules 45 minutes before the golf tournament started.

They were not in the same foursome but after the tournament my husband’s friend caught up to him and could not believe how fantastic he felt. He golfed the entire 18 holes for the first time in 20 years without pain.

-Kay V, Green Bay, Wisconsin

I had a car accident several years ago which resulted in a broken back. I now have two plates and two steel rods supporting my spine. I have constant pain and have been taking 8, 400 mg ibuprofen a day and still have pain. I started 2 capsules twice a day for about two weeks. I have absolutely no pain and now only need to take 1 capsule of this herbal formulation about every 10 days. About the 8th or 9th day I start feeling a little twinge in my back so I take one more capsule and I’m good for another 10 days. I’m taking no other drugs and I stopped taking ibuprofen. Your product is absolutely amazing. Thanks for making such a powerful and safe natural pain relieving formula.

-Dan S, Woodland, Washington

If you are concerned about pharmaceutical drugs with all their side effects, and if you are tired of everyday pain, then the above combination of all natural ingredients may be the answer you are looking for. When in doubt always consult your physician or health care practitioner. This column is to provide you with information to maintain your health.

Terry has 40 years experience in the health food industry and has researched and developed over 300 nutritional and botanical formulations that continue to be top-selling products on the market today. He is credited to be the first to introduce to the U.S. health food market glucosamine sulfate, IP6, black cohosh for menopause, the concept of botanical standardization and the introduction of complex formulations for specific health indications. He is the author of two books, Seven Keys to Vibrant Health and Seven Keys to Unlimited Personal Achievement, and has hosted a nationwide radio show, “Prescription for Health”. In the past 40 years he has accumulated a wealth of experience and knowledge in the field of health and nutrition, and he wants to share with you that knowledge. Terry currently resides in Green Bay Wisconsin where he owns a health food store with his wife, Debra, and he is the President and owner of EuroPharma.
